HARDY FIELD GROWN DELPHINIUMS

For That Splash of Color During June and July

Delphiniums are among the most stately and impressive of all perennials. They produce handsome spikes of gorgeously colored blooms that make a wonderful display in the border and are also fine for cutting. They should be planted in masses at the rear of the hardy border in a sunny or partially shaded location. Full morning sun is preferred.

Named Varieties of the Pacific Hybrids

Black Knight. Deep midnight-violet, the darkest of them all. Flowers of beautiful round form, with heavy velvety texture.

Blue Bird. A clear medium blue with white bee. Tall spikes.

Galahad. Clear white of enormous size with florets averaging 3 inches in diameter. Very heavy, glistening texture.

Guinevere. Light pink-lavender self with white bee.

King Arthur. Brilliant royal violet with large white bee.

Summer Skies. Clearest light blue with white bee.

MIXED COLORS

Pacific Hybrids. The individual flowers are very large, often 2½ inches across on spikes 3 to 4 feet long. Colors range from white, sky-blue to deep blue, purple, violet and exquisite shades of orchid-pink. The plants grow 5 to 7 feet tall. Cut the stems after the first great burst of bloom and they will repeat.

Astolat Strain. A new strain of the popular Giant Pacific Delphiniums, including a good percentage of pink flowers. We suggest that you order at least six plants so as to be sure of getting some pink ones. The other shades run from purest white to dark blue and mauve. All have giant, double flowers. Mixed colors only.

TWO EASY-TO-GROW DELPHINIUMS

Both of these have lovely single florets and grow from 3 to 5 feet high.

Belladonna, Cliveden Beauty. One of the finest of all light blue flowers. Grows 3 to 4 feet tall and after the first great burst of bloom in early summer, it repeats at intervals. A healthy grower that lasts for many years. Lovely in the garden and very fine for cutting.

Lamartine. These rich dark blue flowers should be in every garden. A great mass of bloom, in early summer, repeated at intervals. When you cut a flower spike another grows out to bloom later on. A healthy grower 4 feet or so tall.

DO NOT ALLOW YOUR PHLOX TO GO TO SEED—This is Very Important

Keep blooms cut as they fade. If you permit plants to go to seed they will drop hundreds of seeds right around the base of the plant. Next year masses of seedlings will spring up. These usually have the old magenta color and soon kill out your true variety. This soon makes the bed a mass of seedlings.

FINEST HARDY MUMS

Hardy Chrysanthemums are among the most dependable flowers in the autumn garden, providing glorious color and spicy fragrance from early September (August with some varieties) until heavy frost.

There are Chrysanthemums of many types, from the Cushion Mums for low mounds of color in borders and rock gardens, to the long-stemmed kinds for cutting.

We feel that we have one of America's finest and most up-to-date Chrysanthemum collections. Our list includes selected varieties from the best Chrysanthemum specialists in the country, including some recent introductions and the new imported Super Giant English varieties.

Due to lack of space, we are listing only the most important varieties that we have. Many other sorts are available. Write us if you are interested in them.

CULTURE. Chrysanthemums will grow in any good average garden soil which has been enriched with manure or good commercial fertilizer. Plant them 15 to 18 inches apart. Cultivate the soil between them, particularly while they are in the young stage. You can pinch the plants up to July 15 if they are tall and spindly. Don't pinch any more after that date. Hardy Chrysanthemums do best if grown in full sun. If they are planted in the shade, they will grow too tall, have weak stems, and produce inferior blooms.

Tall Growing Hardy Mums For Cutting—

AVALANCHE. Cherished early white, fluffy, snowy 3½ in. flowers, very compact.

CHAMPAGNE — Ladies adore its pastel pearly-cream, queen-sized blossoms.

JOHN FURST. — Virility to burn as it warms the October scene. Robust 3 in. blooms, brilliant orange-bronze, partially quilled. Cuts nicely—a choice addition.

NOBILITY — New. — Wondrously strong habit, rich gray-green leaves, many velvety dark red blooms, to 3 in. We think it highly ornamental, a plant of character.

PURPLE HEART — Pleasing novelty, for 3 in. recurves of bright grape-stained purple may quill some petals. Silvery whispers also entice, blooms keep well.
